

# How Can You Remove Spots & Stains from your teeth?

- ▶ Our harmless, non-invasive process removes surface impurities that can not be removed by mechanical tooth brushing is quick and painless.
- ▶ This includes ugly dental plaque and pigmentation on your teeth. The treatment itself is not painful and quick. Some people with gingivitis (suffering from hypersensitivity to warm / cold) may be more sensitive to the procedure.
- ▶ **THIS PROCEDURE IS TYPICALLY DONE WITH LITTLE OR NO NUMBING AND DOESN'T REQUIRE DRILLING!**

## Recent Patient Before & After Photos Case Completed

This young patient had fluoride staining that kept her from wanting to smile.

After just one visit, she was able to gain back her confidence

No Injections ! No drilling!

Using our advanced technology microabrasion technique.
